

SignalPoint™ Asset Management, LLC **Performance Disclosures**

SignalPoint™ Asset Management, LLC (SignalPoint) is an independent, privately owned investment management firm registered with the Securities and Exchange Commission. SignalPoint™ offers the management of asset allocated exchange traded fund portfolios to meet various client investment objectives. No investment strategy or asset allocation can guarantee a profit or protect against loss of principal. There is no guarantee that a diversified portfolio will outperform a non-diversified portfolio in any given market environment. Rebalancing investments may cause investors to incur transaction costs and, when rebalancing nonretirement accounts, taxable events may create or increase tax liability. Investing in securities involves some level of risk, including potential loss of principal invested. Past performance does not indicate future results. The investment return and principal value of an investment will fluctuate so that an investor's securities, when redeemed, may be worth more or less than their original cost. There is no assurance that the investment objective will be attained. Investors should consider the investment objectives, risks, charges and expenses of SignalPoint™ carefully before investing. The SignalPoint™ ADV contains this and other information about SignalPoint. You can obtain an ADV from your financial representative or contact us directly at 877-769-9980. We recommend that the ADV be read carefully before investing.

Model Performance Disclosure: Any Model performance shown for the relevant time periods is based upon hypothetical results of a SignalPoint™ model portfolio. Model portfolio performance is the result of retro-active application of the SignalPoint™ investment process, designed with the benefit of hindsight. It does not reflect any investor's actual experience of SignalPoint™ with owning, trading or managing an actual investment account. Thus, the model performance shown does not reflect any material market or economic factors which may have affected the actual performance of the model portfolio if SignalPoint™ had actually been managing the portfolio during the relevant time periods. Model portfolio performance is shown net of a model advisory fee of 1.50%, the highest fee charged by SignalPoint™. Performance does not reflect the deduction of other fees or expenses, including but not limited to brokerage fees, custodial fees and fees and expenses of mutual funds and other investment companies. Performance results shown include the reinvestment of dividends and interest on cash balances. The data used to calculate the model performance was obtained from sources deemed reliable and then organized and presented by SignalPoint™. Returns for various sectors and time periods were recreated by third parties where the relevant ETF did not exist or data was incomplete. The performance calculations have not been audited by any third party. Actual performance of client portfolios may differ materially due to the timing related to the actual deployment and investment of a client portfolio, the reinvestment of dividends, length of time various positions are held, client objectives and restrictions, and fees and expenses incurred by the individual portfolio.

Composite Performance Disclosure: SignalPoint™ has prepared and presented performance in an effort to comply with the Global Investment Performance Standards (GIPS®). SignalPoint™ has not yet begun a firm-wide verification for each SignalPoint™ Strategy for relevant periods. Full discretionary accounts are added to the composite on the first day of the month following the date of their full investment. Accounts are removed from the composite at the month end prior to their account change of status. The composites include taxable and nontaxable discretionary accounts with no restrictions and meet the minimum asset size requirement of \$50,000 (as of August 1, 2008) for inclusion. The composite performance returns illustrated for the relevant time periods reflect a total return of an asset weighted composite including the reinvestment of dividends, interest and capital gains. Performance is a time-weighted total return calculated monthly. Valuations and returns are computed and stated in U.S. dollars, and individual portfolios are revalued monthly. Performance data is shown net of all transaction, management, and custodial fees. Net of fee performance shown reflects the deduction of actual fees deducted from the composite accounts. The composition of SignalPoint™ Portfolios typically differs significantly from the securities that comprise their benchmark indices due to the SignalPoint™ Portfolios' sector allocations, smaller number of holdings, and defensive use of cash balances and derivatives (such as futures contracts). Additional information regarding policies for calculating and reporting returns is available upon request.

Return Comparison: The various indices used by SignalPoint™ have not been selected to represent an appropriate benchmark to compare an investor's performance, but rather are disclosed to allow for comparison of the investor's performance to that of certain well-known and widely recognized indices. Indices are not investments, are unmanaged and do not incur fees or expenses. It is not possible to invest in an index.

PAST PERFORMANCE IS NO GUARANTEE OF FUTURE RESULTS.
